The medical classification is solely based on the presented medical records and can be revised upon the initial medical examinations.

Should you wish to be treated by the chief surgeon or by an appointed physician under the chief surgeon's supervision the estimated costs for this procedure/operation will be 47.040,00 € (diagnostic catheterization incl. PHT-testing 6.900,00 € and complex and complicated surgery utilizing the heart-lung machine: 40.140,00 €) and includes a maximum of 27 days of hospitalization. Each additional day will be billed with 1.535,00 €.

Should you not wish to be treated by the chief surgeon the estimated costs for this procedure/operation will be 31.860,00 € (diagnostic catheterization incl. PHT-testing: 4.800,00 € and complex and complicated surgery utilizing the heart-lung machine: 27.060,00 €) and includes a maximum of 27 days of hospitalization. Each additional day will be billed with 1.150,00 €.
